

At Gwennap Head, We Watch Over One of the Most Dangerous Stretches of Water in the UK

Sometimes, the Weather & Scenery are Stunning

And Sometimes.....

But, Whatever the Weather, Beauty is all Around

As Well as Our Famous Cornish Choughs, We Also Have the Occasional More Surprising Visitor!

And, of Course, our Very Own Cornish Space Rocket Programme*

*Actually, they're 'day marks', which provide a visual warning to vessels, of the extremely dangerous Runnel Stone reef, which is just offshore from the watch 😊

This is NCI Gwennap Head Pop in & See us, Sometime! (or Call us on VHF Channel 65)
